Statement of Purpose

Thank you for providing me this opportunity to pen down my sop. Now, I introduce myself as a student of the undergraduate program in Computer Science Engineering at **xxxxxx** (accredited by AICTE), Hyderabad which is one of the premier engineering colleges in INDIA. I wish to pursue my graduate studies (M.S in Computer Science Engineering) in your esteemed university.

I have never been the only one to struggle for survival but have always sought to try and stand ahead in every facet of my life. Since school I have believed in hard work that little bit of extra effort, which has helped me realize my goals at every stage. In the ever-changing world of Engineering and Technology, where each new day sees a spate of new concepts and applications, I want to attain the highest level of education and place myself in line with opportunities where I can work on the cutting edge. My fundamental reason for wanting to pursue graduation in Computer Science Engineering is my passion to reach the zenith in my chosen field of study and attain perfection in anything I undertake.

An unquenchable thirst for knowledge coupled with an inherent drive to do something different have always been the propelling factors influencing my choices, eventually placing me at the portal of such a challenging line of study. Schooling infused in me a keen sense of analytical reasoning and scientific temperament. Consistent academic performance and good grades were a means to an end for me. The end goal has always been to take the next step and my ceaseless efforts have earned me a Distinction at Intermediate level with Mathematics, Physics and Chemistry as majors.

Since it is Computer Science Engineering that brings about a continuous improvement in the technology, I chose it as my undergraduate major. I have gained a thorough understanding of the various facets of Computer Science Engineering and the projects that I have undertaken have further enhanced my aptitude for research.

During my undergraduate study, I was exposed to subjects related to Computer Science engineering such as Information Technology & Numerical Methods, Object Oriented Programming, Computer Organization, Database Management System, Operating Systems and Systems Programming Lab, Artificial Intelligence, Theory of computation, Principles of Programming Languages, Advanced UNIX Programming Language, Multimedia and Web Design, Neural Networks. Apart from these, I am also well versed with the software languages like C, C++ with Data Structures, Java, Uml and Html. Academically, I am in the **top 10** of the department and I am determined to better this record in my future endeavors.

Education, if chosen and which I do, is an unending process. Excellence in any sphere of life can be achieved with hard work, determination and dedication. Yet, the lack of in-depth

Tel: +977 1 4443526, Fax: +977 1 4420118, info@kiec.edu.np

knowledge of the subject leaves the conceptual skills incomplete. Therefore, I would like to pursue a course that not only supplements the knowledge I possess, but also provide a strong foundation for my research oriented study, which would allow me to explore the unknown in this science of Computer Science Engineering.

My interest in Computer Science engineering stems from the fact that it holds good opportunities and provides a wide scope for research. I have been fascinated by the type of practical challenges it posses .An effective practice in Computer Science Engineering demands the aspect of analyzing, thinking logically and visualizing the impacts of a problem.

Apart from having the academic proficiency, I was actively involved in extra-curricular activities and sports, right from my schooling. During my school days, I have represented my school in various activities and won many prizes in Sports Competition and I have played cricket at school level in the age of 16 and also at the college level.

An eminent faculty, excellent research facilities, pleasant university ambience and a balanced academic program which are very much conducive to the fields of my interest I feel, make the right place to embark upon an academic career. Your university is a confluence of people from varied culture, nationality, religion, race and ideology. I am sure that my exposure to these kinds of diverse influences would aid in the overall development of my personality.

I aver that I possess the intellectual ability and the preparation to set out on an exhilarating and arduous path of graduate study at your university. I am sure that my aptitude and drive will see me through the challenge and I am convinced that my study at your department would be a rewarding experience. I look forward to have a long and beneficial association with your esteemed university with sufficient financial support.

Finally I take this opportunity to thank you for allowing me to express myself and I look forward for my admission into the graduate program of your esteemed university.
